

WHATSAPP BOT: CASE CREATION FLOW SPECIFICATION

Complete Conversational Blueprint, State Machines, Admin Panel Mappings, and Edge Cases

Document Reference	LAW-WA-BOT-FULLBLUEPRINT-v4.0	Target API Platform	Meta Cloud API (WhatsApp Business)
System Context	LawOnCall Lead Intake Service	Status	Production-Ready Specification

1. Core Conversational State Machine

The conversational state of each user is managed in a database table called `WhatsAppSession`. When a message is received, the system checks the user's current state and applies the corresponding input validation rules.

State Name	Bot Output (Question/Prompt)	Allowed Input Format	Next State on Success	Error Handling (On Invalid Input)
INIT	Welcome text + request name.	Free text (String)	AWAITING_NAME	Accepts any text to initialize.
AWAITING_NAME	"Please enter your Full Name:"	String (min 2 chars, matches website schema)	AWAITING_PHONE	Reject if contains numbers or special characters. Ask again.
AWAITING_PHONE	"Please confirm your 10-digit mobile number:"	String matching regex <code>/^[6-9]\d{9}\$/</code>	AWAITING_CITY	Reject if not matching Indian phone pattern. Prompt to re-enter.
AWAITING_CITY	Sends list matching: [Delhi], [Gautam Buddha Nagar], [Ghaziabad].	Interactive Button/List selection only.	AWAITING_CATEGORY	Reject free text. Resend the list buttons.
AWAITING_CATEGORY	Sends list of 9 website categories.	Interactive List selection only.	AWAITING_DESC	Reject free text. Resend the category list.
AWAITING_DESC	"Please describe your legal issue (Min 10 characters):"	String (min 10 chars, matches website schema)	AWAITING_TIME	Reject if less than 10 characters. Request more detail.
AWAITING_TIME	Sends buttons: [ASAP (60 min)], [Later Today].	Interactive Button selection only.	AWAITING_CONSENT	Resend time preference buttons.
AWAITING_CONSENT	"Do you agree to our Terms & Privacy Policy?"	Buttons: [I Agree], [View Terms]	COMPLETED	Reject if terms are not accepted. State that consent is mandatory.

2. Conversational Scenarios & Edge Cases

● Scenario 1: Standard Success Flow (Ditto Website Alignment)

- **User (Inputs):** Types "Book Consultation"
- **Bot (Outputs):** "Hello! Let's register your legal case. Please reply with your ****Full Name****."
- **User (Inputs):** "Rahul Sharma"
- **Bot (Outputs):** "Got it, Rahul. Please confirm your ****10-digit mobile number**** (without +91 or 0):"
- **User (Inputs):** "9876543210"
- **Bot (Outputs):** Sends List Message: "Please select your ****City****:"
Options: [Delhi] [Gautam Buddha Nagar] [Ghaziabad]
- **User (Inputs):** Selects ****[Gautam Buddha Nagar]****
- **Bot (Outputs):** Sends List Message: "Please select your ****Issue Category****:"
Options: [Family & Marriage] [Domestic Violence] [Property & Registry] [Criminal & Police] [Supreme Court Lawyer] [Cyber & Digital Fraud] [Employment & HR] [Consumer Complaints] [Other]
- **User (Inputs):** Selects ****[Property & Registry]****
- **Bot (Outputs):** "Please describe your legal concern (Minimum 10 characters):"
- **User (Inputs):** "Builder has delayed possession of my flat by over 12 months."
- **Bot (Outputs):** Sends Buttons: "When would you like to consult?"
Buttons: [ASAP (60 min)] [Later Today]
- **User (Inputs):** Selects ****[ASAP (60 min)]****
- **Bot (Outputs):** Sends Buttons: "To proceed, please agree to our Terms & Conditions and Privacy Policy:"
Buttons: [I Agree] [Read T&C]
- **User (Inputs):** Selects ****[I Agree]****
- **Bot (Outputs):** "Perfect! Your consultation request has been registered successfully. A verified property advocate will call you on +919876543210 shortly. Tracking URL: <https://lawoncall.in/track/xxx>"

● Scenario 2: Existing Client Re-engagement

- **User (Inputs):** Type "Hi"
- **Bot (Outputs):** Recognizes active case in database.
"Welcome back, Rajesh! You have an active consultation scheduled for today. What would you like to do?"
Buttons: [Get Advocate Details] [Reschedule Call] [Create New Case]
- **User (Inputs):** Selects ****[Get Advocate Details]****
- **Bot (Outputs):** Fetches assigned lawyer metadata.
"Advocate Assigned: Mr. Anil Sharma (High Court Advocate). Call status: Connecting. Tracking link: <https://lawoncall.in/track/xxx>"

● Scenario 3: Existing Advocate Re-engagement

- **User (Inputs):** Type *"Status updates"*
- **Bot (Outputs):** Detects user role: LAWYER.
"Hello Advocate Anil! Here is your quick dashboard assistant. Please choose an action:"
Buttons: [Toggle Online/Offline] [View My Assignments] [View Earnings]
- **User (Inputs):** Selects ***[Toggle Online/Offline]***
- **Bot (Outputs):** Triggers database update.
*"Your status is now updated to ****Active & Receiving Calls****. Clients can request instant consultations."*

● Scenario 4: Validation Error & Fallback Loop

- **User is at AWAITING_NAME step.**
- **User (Inputs):** "123456" (Invalid name)
- **Bot (Outputs):** "Sorry, that doesn't look like a valid name. Please enter your name using letters only (e.g., Rajesh Kumar)."
- **User (Inputs):** "!!@# \$" (Invalid name, Attempt 2)
- **Bot (Outputs):** "We are having trouble validating your name. Please try once more, or type 'AGENT' to speak with support."
- **User (Inputs):** "xyz" (Invalid name, Attempt 3)
- **Bot (Outputs):** Triggers Fallback SLA.
"Transferring request to support team. A customer executive will message you here shortly to help you manually."
(System flags WhatsAppSession as 'ESCALATED' and sends an alert to Admin Dashboard)

📞 Scenario 5: User Requests Human Agent (Operator Override)

- **User (Inputs):** Types "help", "agent", or "speak to human" at any point.
- **Bot (Outputs):** Halts the automated flow, flags the database session, and alerts support.
"I have paused the automated bot. Connecting you to a live support executive..."

🌙 Scenario 6: Out of Office Hours SLA

- **User (Inputs):** Selects **[ASAP (60 min)]** during slot selection at 2:00 AM.
- **Bot (Outputs):** Detects time is outside standard hours (9 AM - 9 PM).
"Note: Our advocates are currently offline. I have registered your case, and we will schedule your callback first thing tomorrow morning at 9:30 AM."

🚫 Scenario 7: Profanity or Spam Input Detection

- **User (Inputs):** Types abusive words or gibberish (e.g., "asdfghjkl").
- **Bot (Outputs):** Filters the input using regex patterns.
"We detected invalid or inappropriate content. Please reply with valid information to proceed, or your session will be suspended."

💡 Scenario 8: Duplicate Lead Prevention

- **User (Inputs):** Tries to register a case while another one is pending within the last 15 minutes.
- **Bot (Outputs):** Identifies duplicate match.
"You already have a pending callback request for Property Dispute. We are connecting your call shortly. Please do not submit a duplicate request."

 Scenario 9: User Requests to Go Back / Correct Mistake

- **User (Inputs):** Types "*back*" or clicks a ****[Go Back]**** button during category selection.
- **Bot (Outputs):** Resets the step pointer in `WhatsAppSession` and prompts them for the previous value again:
"Returning to the previous step. Please enter your Full Name:"

3. Admin Panel Mappings (Ditto Website Mappings)

When a lead is successfully finalized via the WhatsApp bot, it is written to the database `Lead` table. The existing Admin Dashboard loads these records from `/api/leads` and groups them into **Flows** depending on the `preferredTime` parameter value:

WhatsApp User Input Selection	Database Parameter Saved (<code>preferredTime</code>)	Admin Panel Flow Category	Admin Panel Behavior & SLAs
ASAP (60 min)	" ASAP "	Flow 2	Renders with a high-priority tag. Callback must be completed within 60 minutes.
Later Today	" LATER "	Flow 3 (Same Day)	Renders in the standard queue. Advocate assigned for callback later today.
SLA Inactivity Drop-off (Automatic)	" callback "	Flow 1	Renders as a standard cold callback lead. Support team contacts the user manually.
Validation Escalation / Urgent Help	" emergency "	Flow 4	Triggers emergency banner alerts on the Admin Panel with sound notifications.

4. SLA (Service Level Agreement) Flow Rules

To ensure leads are converted, the system runs a cron scheduler checking the `WhatsAppSession` table every 5 minutes to trigger the following drop-off nudges:

Trigger Condition	Action / Nudge Content	SLA Threshold
User idle at any step.	Send Nudge 1: "Hi {name}, would you like to finish creating your legal consultation case? Click below:" [Resume] [Cancel]	30 Minutes Inactivity
User idle after Nudge 1.	Send Nudge 2: "Last chance: Our advocates are currently available. Let's finish your request now." [Resume]	4 Hours Inactivity
No response to Nudge 2.	Mark session as EXPIRED in database and clear data.	24 Hours Inactivity
User escalates to Agent.	Nudge support agent on Admin Dashboard via socket.io/Email.	5 Minutes response SLA

5. Meta Cloud API Payload Examples

5.1. Send List Message (Category Selection)

```
// Outgoing list selection payload to Meta API
POST https://graph.facebook.com/v18.0/{phone_number_id}/messages
Headers:
  Authorization: Bearer {Access_Token}
  Content-Type: application/json

{
  "messaging_product": "whatsapp",
  "recipient_type": "individual",
  "to": "+919876543210",
  "type": "interactive",
  "interactive": {
    "type": "list",
    "header": { "type": "text", "text": "Select Category" },
    "body": { "text": "Select the category that best describes your issue:" },
    "footer": { "text": "Select one option below" },
    "action": {
      "button": "Select Category",
      "sections": [{
        "title": "Legal Areas",
        "rows": [
          { "id": "cat_family", "title": "Family & Marriage" },
          { "id": "cat_violence", "title": "Domestic Violence" },
          { "id": "cat_property", "title": "Property & Registry" },
          { "id": "cat_police", "title": "Criminal & Police" },
          { "id": "cat_cyber", "title": "Cyber & Digital Fraud" },
          { "id": "cat_employment", "title": "Employment & HR" }
        ]
      }]
    }
  }
}
```
