

# WHATSAPP BOT: CASE CREATION FLOW SPECIFICATION

Comprehensive End-to-End Conversational Blueprint, State Machines, and SLA Escalations

|                    |                               |                     |                                     |
|--------------------|-------------------------------|---------------------|-------------------------------------|
| Document Reference | LAW-WA-BOT-FULLSPEC-v2.0      | Target API Platform | Meta Cloud API (WhatsApp Business)  |
| System Context     | LawOnCall Lead Intake Service | Document Scope      | Production Implementation Blueprint |

## 1. Introduction & Conversational Architecture

This document details the complete production design for the **LawOnCall WhatsApp Bot**. The bot provides a fully guided client intake, validation, and case routing workflow. By translating incoming user actions into database events, it acts as a zero-friction channel for legal lead acquisition.

## 2. Core Conversational State Machine

The conversational state of each user is managed in a database table called `WhatsAppSession`. When a message is received, the system checks the user's current state and applies the corresponding input validation rules.

| State Name        | Bot Output (Question/Prompt)                            | Allowed Input Format            | Next State on Success | Error Handling (On Invalid Input)                               |
|-------------------|---------------------------------------------------------|---------------------------------|-----------------------|-----------------------------------------------------------------|
| INIT              | Welcome text + request name.                            | Free text (String)              | AWAITING_NAME         | Accepts any text to initialize.                                 |
| AWAITING_NAME     | "Please enter your Full Name:"                          | Free text (String, 3–50 chars)  | AWAITING_CATEGORY     | Reject if contains numbers or special characters. Ask again.    |
| AWAITING_CATEGORY | Interactive list of Legal Categories.                   | Interactive Button / List Click | AWAITING_CITY         | Reject typed messages. Show the buttons again.                  |
| AWAITING_CITY     | "Which city are you located in?"                        | Free text (String, 2–30 chars)  | AWAITING_DESC         | Validate city name against standard dictionary. Ask to confirm. |
| AWAITING_DESC     | "Please describe your legal issue in a single message:" | Free text (Min 15 chars)        | AWAITING_SLOT         | Reject short inputs. Request more descriptive details.          |
| AWAITING_SLOT     | Callback slot selection buttons.                        | Interactive Button Click        | COMPLETED             | Show slot buttons again.                                        |

### 3. End-to-End Conversational Scenarios

#### ● Scenario 1: Standard Success Flow (New Client Intake)

This is the standard path when a client completes all onboarding steps without error.

- **User (Inputs):** Type *"Book Consultation"*
- **Bot (Outputs):** *"Hello! Let's register your legal case. Please reply with your \*\*Full Name\*\*."*
- **User (Inputs):** *"Rajesh Kumar"*
- **Bot (Outputs):** Sends List Message: *"Please select a legal category:"*  
List Options: [Family Law] [Property Dispute] [Corporate Law] [Labour/Employment] [Other]
- **User (Inputs):** Selects *\*\*[Family Law]\*\**
- **Bot (Outputs):** *"Thank you. Which \*\*City\*\* are you located in?"*
- **User (Inputs):** *"Mumbai"*
- **Bot (Outputs):** *"Please describe your legal issue in a single message."*
- **User (Inputs):** *"Want advice on divorce filings and mutual child custody rules."*
- **Bot (Outputs):** Sends Buttons: *"When would you like our legal advocate to call you?"*  
Buttons: [Immediate Call] [Evening (5–8 PM)] [Tomorrow Morning]
- **User (Inputs):** Selects *\*\*[Immediate Call]\*\**
- **Bot (Outputs):** *"Done! Your case has been created. A verified advocate specializing in Family Law will call you on +919876543210 within 15 minutes. Tracking URL: <https://lawoncall.in/track/xxx>"*

#### ● Scenario 2: Existing Client Re-engagement

How the bot behaves when the phone number matches a user who already has an active Lead or Booking in the database.

- **User (Inputs):** Type *"Hi"*
- **Bot (Outputs):** Recognizes active case in database.  
*"Welcome back, Rajesh! You have an active consultation scheduled for today. What would you like to do?"*  
Buttons: [Get Advocate Details] [Reschedule Call] [Create New Case]
- **User (Inputs):** Selects *\*\*[Get Advocate Details]\*\**
- **Bot (Outputs):** Fetches assigned lawyer metadata.  
*"Advocate Assigned: Mr. Anil Sharma (High Court Advocate). Call status: Connecting. Tracking link: <https://lawoncall.in/track/xxx>"*

### ● Scenario 3: Existing Advocate Re-engagement

If the incoming WhatsApp number matches a lawyer registered in the database, the bot switches to Advocate Dashboard mode.

- **User (Inputs):** Type *"Status updates"*
- **Bot (Outputs):** Detects user role: LAWYER.  
*"Hello Advocate Anil! Here is your quick dashboard assistant. Please choose an action:"*  
Buttons: [Toggle Online/Offline] [View My Assignments] [View Earnings]
- **User (Inputs):** Selects **\*\*[Toggle Online/Offline]\*\***
- **Bot (Outputs):** Triggers database update.  
*"Your status is now updated to **\*\*Active & Receiving Calls\*\***. Clients can request instant consultations."*

#### ● Scenario 4: Validation Error & Fallback Loop

This flow details what happens if the user repeatedly inputs garbage data at any text step.

- **User is at AWAITING\_NAME step.**
- **User (Inputs):** "123456"(Invalid name)
- **Bot (Outputs):** "Sorry, that doesn't look like a valid name. Please enter your name using letters only (e.g., Rajesh Kumar)."
- **User (Inputs):** "!!@#\$(Invalid name, Attempt 2)
- **Bot (Outputs):** "We are having trouble validating your name. Please try once more, or type 'AGENT' to speak with support."
- **User (Inputs):** "xyz"(Invalid name, Attempt 3)
- **Bot (Outputs):** Triggers Fallback SLA.  
"Transferring request to support team. A customer executive will message you here shortly to help you manually."  
\*(System flags WhatsAppSession as 'ESCALATED' and sends an alert to Admin Dashboard)\*

#### 📞 Scenario 5: User Requests Human Agent (Operator Override)

- **User (Inputs):** Types "help", "agent", or "speak to human" at any point.
- **Bot (Outputs):** Halts the automated flow, flags the database session, and alerts support.  
"I have paused the automated bot. Connecting you to a live support executive..."

#### 🕒 Scenario 6: Out of Office Hours SLA

If a user initiates a case registration during non-operational hours (e.g. 2:00 AM):

- **User (Inputs):** Selects \*\*[Immediate Call]\*\* during slot selection.
- **Bot (Outputs):** Detects time is outside standard hours (9 AM – 9 PM).  
"Note: Our advocates are currently offline. I have registered your case, and we will schedule your callback first thing tomorrow morning at 9:30 AM."

## 4. SLA (Service Level Agreement) Flow Rules

To ensure leads are converted, the system runs a cron scheduler checking the `WhatsAppSession` table every 5 minutes to trigger the following drop-off nudges:

| Trigger Condition        | Action / Nudge Content                                                                                                  | SLA Threshold          |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------|------------------------|
| User idle at any step.   | Send Nudge 1: "Hi {name}, would you like to finish creating your legal consultation case? Click below:"[Resume][Cancel] | 30 Minutes Inactivity  |
| User idle after Nudge 1. | Send Nudge 2: "Last chance: Our advocates are currently available. Let's finish your request now."[Resume]              | 4 Hours Inactivity     |
| No response to Nudge 2.  | Mark session as <b>**EXPIRED**</b> in database and clear data.                                                          | 24 Hours Inactivity    |
| User escalates to Agent. | Nudge support agent on Admin Dashboard via socket.io/Email.                                                             | 5 Minutes response SLA |

## 5. Meta Cloud API Payload Examples

### 5.1. Send List Message (Category Selection)

```
// Outgoing list selection payload to Meta API
POST https://graph.facebook.com/v18.0/{phone_number_id}/messages
Headers:
  Authorization: Bearer {Access_Token}
  Content-Type: application/json

{
  "messaging_product": "whatsapp",
  "recipient_type": "individual",
  "to": "+919876543210",
  "type": "interactive",
  "interactive": {
    "type": "list",
    "header": { "type": "text", "text": "LawOnCall Case Registration" },
    "body": { "text": "Please select the legal category of your dispute:" },
    "footer": { "text": "Select one option below" },
    "action": {
      "button": "Select Category",
      "sections": [{
        "title": "Legal Areas",
        "rows": [
          { "id": "cat_family", "title": "Family Law", "description": "Divorce, custody, maintenance" },
          { "id": "cat_property", "title": "Property Dispute", "description": "Landlord, tenant, land" },
          { "id": "cat_corporate", "title": "Corporate Law", "description": "Business, contracts, sta" },
          { "id": "cat_labour", "title": "Labour Law", "description": "Employment disputes, salary is" }
        ]
      }]
    }
  }
}
```

## 5.2. Send Callback Slot Buttons

```
// Outgoing button template payload to Meta API
POST https://graph.facebook.com/v18.0/{phone_number_id}/messages
Headers:
  Authorization: Bearer {Access_Token}
  Content-Type: application/json

{
  "messaging_product": "whatsapp",
  "recipient_type": "individual",
  "to": "+919876543210",
  "type": "interactive",
  "interactive": {
    "type": "button",
    "body": { "text": "When should our lawyer call you back?" },
    "action": {
      "buttons": [
        { "type": "reply", "reply": { "id": "slot_immediate", "title": "Immediate (15m)" } },
        { "type": "reply", "reply": { "id": "slot_evening", "title": "Evening (5-8 PM)" } },
        { "type": "reply", "reply": { "id": "slot_tomorrow", "title": "Tomorrow" } }
      ]
    }
  }
}
```
