

WHATSAPP BOT: CASE CREATION FLOW SPECIFICATION

Complete Conversational Blueprint Aligned with Website IntakeForm.tsx

Document Reference	LAW-WA-BOT-DITTO-v3.0	Target API Platform	Meta Cloud API (WhatsApp Business)
System Context	LawOnCall Lead Intake Service	Alignment Source	Website IntakeForm.tsx Integration

1. Introduction & Conversational Architecture

This document details the complete production design for the **LawOnCall WhatsApp Bot**. The bot provides a guided client intake workflow that matches the exact validation rules, options, and categories defined in the website's `IntakeForm.tsx`.

2. Website-Aligned State Machine

The conversational state of each user is managed in a database table called `WhatsAppSession`. Below is the step-by-step state machine with the exact validations from the website.

State Name	Bot Output (Question/Prompt)	Allowed Input Format / Validation Rules	Next State	Error Handling (On Invalid Input)
INIT	Welcome text + request name.	Free text (String)	AWAITING_NAME	Accepts any text to initialize.
AWAITING_NAME	"Please enter your Full Name:"	String (min 2 chars, matches <code>z.string().min(2)</code>)	AWAITING_PHONE	Reject if empty or less than 2 chars. Prompt to re-enter.
AWAITING_PHONE	"Please confirm your 10-digit mobile number:"	String matching regex <code>/^[6-9]\d{9}\$/</code>	AWAITING_CITY	Reject if not matching Indian phone pattern. Prompt to re-enter.
AWAITING_CITY	Sends list matching: [Delhi], [Gautam Buddha Nagar], [Ghaziabad].	Interactive Button/List selection only.	AWAITING_CATEGORY	Reject free text. Resend the list buttons.
AWAITING_CATEGORY	Sends list of 9 website categories.	Interactive List selection only.	AWAITING_DESC	Reject free text. Resend the category list.
AWAITING_DESC	"Please describe your legal issue (Min 10 characters):"	String (min 10 chars, matches <code>z.string().min(10)</code>)	AWAITING_TIME	Reject if less than 10 characters. Request more detail.

State Name	Bot Output (Question/Prompt)	Allowed Input Format / Validation Rules	Next State	Error Handling (On Invalid Input)
AWAITING_TIME	Sends buttons: [ASAP (60 min)], [Later Today].	Interactive Button selection only.	AWAITING_CONSENT	Resend time preference buttons.
AWAITING_CONSENT	"Do you agree to our Terms & Privacy Policy?"	Buttons: [I Agree], [View Terms]	COMPLETED	Reject if terms are not accepted. State that consent is mandatory.

3. End-to-End Conversational Scenarios

● Scenario 1: Standard Success Flow (Ditto Website Alignment)

- **User (Inputs):** Types "Book Consultation"
- **Bot (Outputs):** "Hello! Let's register your legal case. Please reply with your ****Full Name****."
- **User (Inputs):** "Rahul Sharma"
- **Bot (Outputs):** "Got it, Rahul. Please confirm your ****10-digit mobile number**** (without +91 or 0):"
- **User (Inputs):** "9876543210"
- **Bot (Outputs):** Sends List Message: "Please select your ****City****:"
Options: [Delhi] [Gautam Buddha Nagar] [Ghaziabad]
- **User (Inputs):** Selects ****[Gautam Buddha Nagar]****
- **Bot (Outputs):** Sends List Message: "Please select your ****Issue Category****:"
Options: [Family & Marriage] [Domestic Violence] [Property & Registry] [Criminal & Police] [Supreme Court Lawyer] [Cyber & Digital Fraud] [Employment & HR] [Consumer Complaints] [Other]
- **User (Inputs):** Selects ****[Property & Registry]****
- **Bot (Outputs):** "Please describe your legal concern (Minimum 10 characters):"
- **User (Inputs):** "Builder has delayed possession of my flat by over 12 months."
- **Bot (Outputs):** Sends Buttons: "When would you like to consult?"
Buttons: [ASAP (60 min)] [Later Today]
- **User (Inputs):** Selects ****[ASAP (60 min)]****
- **Bot (Outputs):** Sends Buttons: "To proceed, please agree to our Terms & Conditions and Privacy Policy:"
Buttons: [I Agree] [Read T&C]
- **User (Inputs):** Selects ****[I Agree]****
- **Bot (Outputs):** "Perfect! Your consultation request has been registered successfully. A verified property advocate will call you on +919876543210 shortly. Tracking URL: <https://lawoncall.in/track/xxx>"

● Scenario 2: Validation Failures & Loops

This flow details what happens if the user inputs incorrect phone numbers or short descriptions.

- **User is at AWAITING_PHONE step.**
- **User (Inputs):** "12345" (Invalid phone number)
- **Bot (Outputs):** "❌ Enter a valid 10-digit phone number (starting with 6, 7, 8, or 9):"
- **User is at AWAITING_DESC step.**
- **User (Inputs):** "Help" (Too short - less than 10 characters)
- **Bot (Outputs):** "❌ Please provide a bit more detail about your issue (minimum 10 characters):"

4. SLA (Service Level Agreement) Engine Rules

To maximize lead conversion, the system monitors the `WhatsAppSession` database table every 5 minutes and runs the following SLA reminders:

Trigger Condition	Action / Nudge Content	SLA Threshold
User idle at any step.	Send Nudge 1: <i>"Hi {name}, you were filling out your consultation request. Let's finish your request now so we can connect you with an advocate."</i> [Resume] [Cancel]	30 Minutes Inactivity
User idle after Nudge 1.	Send Nudge 2: <i>"Final reminder: Advocates specializing in your category are online. Would you like to complete your booking?"</i> [Resume]	4 Hours Inactivity
No response to Nudge 2.	Mark session as **EXPIRED** in database and clear data.	24 Hours Inactivity
Validation Failures >= 3.	Pause automation, flag session as **ESCALATED** , and notify a live agent on the Admin Dashboard via WebSocket.	Immediate Escalation

5. Meta Cloud API Payload Examples (Ditto Website Options)

5.1. Send City Selection (List Message)

```
// Outgoing list selection payload to Meta API
POST https://graph.facebook.com/v18.0/{phone_number_id}/messages
Headers:
  Authorization: Bearer {Access_Token}
  Content-Type: application/json

{
  "messaging_product": "whatsapp",
  "recipient_type": "individual",
  "to": "+919876543210",
  "type": "interactive",
  "interactive": {
    "type": "list",
    "header": { "type": "text", "text": "Select Location" },
    "body": { "text": "Please select your city from the options below:" },
    "footer": { "text": "Supported Locations" },
    "action": {
      "button": "Select City",
      "sections": [{
        "title": "Cities",
        "rows": [
          { "id": "city_delhi", "title": "Delhi" },
          { "id": "city_gb_nagar", "title": "Gautam Buddha Nagar" },
          { "id": "city_ghaziabad", "title": "Ghaziabad" }
        ]
      }]
    }
  }
}
```
